Method and Substance in Macrocomparative Analysis
Research Methods Series

General Editors: Bernhard Kittel, Professor of Social Science Methodology, Department of Social Sciences, Carl von Ossietzky Universität Oldenburg, Germany and Benoît Rihoux, Professor of Political Science, Université catholique de Louvain (UCL), Belgium.

In association with the European Consortium for Political Research (ECPR), Palgrave Macmillan is delighted to announce the launch of a new book series dedicated to producing cutting-edge titles in Research Methods. While political science currently tends to import methods developed in neighbouring disciplines, the series contributes to developing a methodological apparatus focusing on those methods which are appropriate in dealing with the specific research problems of the discipline.

The series provides students and scholars with state-of-the-art scholarship on methodology, methods and techniques. It comprises innovative and intellectually rigorous monographs and edited collections which bridge schools of thought and cross the boundaries of conventional approaches. The series covers both empirical-analytical and interpretive approaches, micro and macro studies, and quantitative and qualitative methods.

Titles include:

Audie Kлотz and Deepa Prakash (editors)
QUALITATIVE METHODS IN INTERNATIONAL RELATIONS
A Pluralist Guide

Lane Kenworthy and Alexander Hicks (editors)
METHOD AND SUBSTANCE IN MACROCOMPARATIVE ANALYSIS

Research Methods Series

(outside North America only)

You can receive future titles in this series as they are published by placing a standing order. Please contact your bookseller or, in case of difficulty, write to us at the address below with your name and address, the title of the series and one of the ISBNs quoted above.

Method and Substance in Macrocomparative Analysis

Edited by

Lane Kenworthy
Professor of Sociology and Political Science
University of Arizona, USA

and

Alexander Hicks
Professor of Sociology
Emory University, USA
To the memory of Michael Wallerstein – friend, colleague, exemplary macrocomparativist

## Contents

| List of Tables | ix |
| List of Figures | xii |
| Notes on Contributors | xiv |

1 **Introduction**  
*Lane Kenworthy and Alexander Hicks*

2 **Statistical Narratives and the Properties of Macro-Level Variables: Labor Market Institutions and Employment Performance in Macrocomparative Research**  
*Bernhard Kittel*

3 **Comparative Employment Performance: A Fuzzy-Set Analysis**  
*Jessica Epstein, Daniel Duerr, Lane Kenworthy, and Charles Ragin*

4 **Do Family Policies Shape Women’s Employment? A Comparative Historical Analysis of France and the Netherlands**  
*Joya Misra and Lucian Jude*

5 **The Welfare State, Family Policies, and Women’s Labor Force Participation: Combining Fuzzy-Set and Statistical Methods to Assess Causal Relations and Estimate Causal Effects**  
*Scott R. Eliason, Robin Stryker, and Eric Tranby*

6 **Family Policies and Women’s Employment: A Regression Analysis**  
*Alexander Hicks and Lane Kenworthy*

7 **Part-Time Work and the Legacy of Breadwinner Welfare States: A Panel Study of Women’s Employment Patterns in Germany, the United Kingdom, and the Netherlands, 1992–2002**  
*Jelle Visser and Mara Yerkes*
8 Comparative Regime Analysis: Early Exit from Work in Europe, Japan, and the USA 260
   Bernhard Ebbinghaus

9 Identifying the Causal Effect of Political Regimes on Employment 290
   Adam Przeworski

Index 315
List of Tables

1.1 Analytical strengths of the three methodological approaches 7
1.2 Summary of the contributions 19
2.1 Cross-sectional and time variance components of main variables 40
2.2 Autoregression 40
2.3 Nonstationarity: Maddala and Wu’s Fisher test 41
2.4 Service employment and replacement rate: panel models 45
2.5 Employment in private sector consumer services, cross-sectional analysis model 1: cross-section model, 1981 49
2.6 Controlling for other factors 53
2.7 Explaining variation in long-term change of private service employment, 1981–91 55
2.8 Pooled model, first differences 58
2.9 Scores for replacement rate 59
2.10 Reanalysis using new data for replacement rate 60
3.1 Truth table from analysis of all six causal conditions 75
3.2 Examples of solution sets 78
3.3 Five causal pathways 82
3A.1 Fuzzy-set scores 87
4.1 Values regarding work and family, 1990 and 1999 117
5.1 Decade means and standard deviations for cumulative left cabinet incumbency 148
5.2 Decade means and standard deviations for percentage civilian government employment 149
5.3 Decade means and standard deviations for maternity leave index 150
5.4 Decade means and standard deviations for public day care index, children ages 0–2 151
5.5 Decade means and standard deviations for public day care index, children ages 3–School age 152
5.6 Decade means and standard deviations for weeks of extended leave 153
5.7 Decade means and standard deviations for Cash/Tax Family/Child Benefits Index 154
5.8 Decade means and standard deviations for female labor force participation rates 154
5.9 Select five-way and four-way partition tests of goodness-of-fit F statistics for the outcome “High Female Labor Force Participation – Subsequent Year” 157
5.10 Goodness-of-fit for relationships between hypothesized causal condition “High Level of Cumulative Left Cabinet Incumbency” and select outcomes 160
5.11 Goodness-of-fit for relationships between outcome “High Female Labor Force Participation – Subsequent Year” and select hypothesized causal conditions 162
5.12 Bootstrapped EDF estimates of compliers average causal effects on female labor force participation rates, with strong left political tradition as the instrument in the intention-to-treat analysis 163
5.13 Bootstrapped EDF estimates of compliers average causal effects on female labor force participation rates, with all other non-left political traditions as the instrument in the intention-to-treat analysis 165
6.1 Correlations between family policy measures 204
6.2 Principal components analysis of the four family policy measures 204
6.3 Regression results 206
6.4 Regression results: change in women’s employment on level of family policy generosity 217
7.1 Employment rates by presence of children, 2000 222
7.2 Distribution of women aged 15–64 years by labor market status in 1992–2002, by birth cohort 236
7.3A Determinants of labor market status of women – inactive (Ref: full-time) 238
7.3B Determinants of labor market status of women – short part-time, 1–19 hrs (Ref: full-time) 239
7.3C Determinants of labor market status of women – long part-time, 20–34 hrs (Ref: full-time) 240
7.4A Determinants of labor market transitions into inactivity 243
7.4B Determinants of labor market transitions to job from inactive status 245
7.5 Preferred and actual working hours of women with children under six, living in a couple, 1998 247
7.6 Preferences for more or less working hours and chances to realize preferences, 1992–2002 248
7.7 Determinants of women’s preferences for more or less working hours 251
8.1 Conceptual map of protection, production, and partnership regimes 268
8.2 Relative exit rates, men and women aged 60–64, 1970–2003 274
8.3 Index of pathways ranked by exit opportunities 279
8.4 Early exit from work and regime configurations 283
9.1 Different estimates of the average treatment effect 308
9.2 Estimates of the effect of the treatment on the treated and on the control group 308
List of Figures

1.1 Employment levels and employment change, 1979 to 2005 3
1.2 Women’s and men’s employment levels, 2005 5
1.3 Illustration of causal sufficiency and necessity 10
1.4 Illustration of “nearly always sufficient” 11
1.5 Illustration of small-N ordinal comparison 15
1.6 Mahoney’s argument for use of small-N analysis to eliminate a hypothesized sufficient or necessary condition 16
1.7 Summary of analysis in Schettkat (2005) 17
2.1 Main variables 39
2.2 Replacement rate and service sector employment 43
2.3 Annual changes in service employment 47
2.4 Long-term changes, 1982–91 48
2.5 Employment regulation and private service employment 50
2.6 Private service employment: replacement rate effect conditional on employment regulations 51
2.7 Change in private service employment, 1981–91: replacement rate effect conditional on employment regulations 56
2.8 Change in private service employment, 1981–91: replacement rate effect conditional on employment regulations, new data for replacement rate 61
3.1 Employment change in low-end private sector services, 1979 to 1995 70
3.2 Employment change fuzzy-set scores by employment change raw values 71
3.3 Causal condition fuzzy-set scores by raw values 73
3.4 Consistency and coverage 79
3.5 Poor employment change performance by causal configurations 1–4 from Table 3.3 83
3.6 Poor employment change performance by causal configuration 5 from Table 3.3 84
4.1 Employment rate for women as a proportion of all women, 15–64 97
4.2 Employment rate for women between 25 and 54, 1968–2004 98

Notes on Contributors

Daniel Duerr is a PhD candidate in sociology at the University of Arizona. His research focuses on the development of the welfare state, stratification and income equality, and the causes of poverty in affluent countries.

Bernhard Ebbinghaus is professor of sociology and director, Mannheim Centre for European Social Research (MZES), University of Mannheim, Germany. His recent publications include *Reforming Early Retirement in Europe, Japan and the USA* (2006). His research interests are welfare state analysis, industrial relations, institutional theory, and comparative methods.

Scott Eliason is associate professor of sociology, and faculty affiliate of the Minnesota Population Center, at the University of Minnesota. He is also a faculty fellow at the Center for the Study of Poverty and Inequality at Stanford University. His research interests and publications span the areas of quantitative methodology and statistics, sociology of labor markets, stratification, law and organizations, the welfare state, and the life course.

Jessica Epstein is a PhD candidate in sociology at the University of Arizona. Her research interests are the political economy of food and agriculture, political ecology, and research methods.

Alexander Hicks is Winship Distinguished Research Professor of Sociology at Emory University. His publications include *Social Democracy and Welfare Capitalism* (1999) and articles in leading sociology and political science journals. He has twice served as editorial board member for the *American Sociological Review* and was inaugural co-editor of *Socio-Economic Review*.

Lucian Jude is a former doctoral student in sociology at the University of Massachusetts – Amherst.

Lane Kenworthy is professor of sociology and political science at the University of Arizona. He studies the causes and consequences of poverty, inequality, mobility, employment, economic growth, and social policy

**Bernhard Kittel** is full professor of social science methodology at the University of Oldenburg, Germany. His research interests include methodology of cross-national research, in particular of the welfare state and industrial relations, and the experimental study of political decision making. Recent publications include “A Crazy Methodology? On the Limits of Macro-quantitative Social Science Research”, *International Sociology* (2006); “European Rigidity vs. American Flexibility? The Institutional Adaptability of Collective Bargaining,” *Work and Occupations* (2005, with Bernhard Ebbinghaus).

**Joya Misra** is associate professor of sociology and public policy at the University of Massachusetts, Amherst. Her research focuses on comparative welfare states and the intersection of race/ethnicity, nationality, gender, and class in labor markets and social policy. She has published articles in journals such as *American Sociological Review*, *American Journal of Sociology*, *Socio-Economic Review*, and *Social Problems*.

**Charles C. Ragin** is professor of sociology and political science at the University of Arizona. In 2000/01 he was a Fellow at the Center for Advanced Study in the Behavioral Sciences at Stanford University, and before that he was professor of sociology and political science at Northwestern University. His main interests are methodology, political sociology, and comparative-historical research, with a special focus on such topics as the welfare state, ethnic political mobilization, and international political economy. His books include *Redesigning Social Inquiry: Fuzzy Sets and Beyond* (2008), *Fuzzy-Set Social Science* (2000), *Constructing Social Research: The Unity and Diversity of Method* (1994), *What is a Case? Exploring the Foundations of Social Research* (with Howard

Eric Tranby is a PhD candidate in sociology at the University of Minnesota. His research interests include gender and racial inequality in contemporary social life, comparative public policy, and life course research. His dissertation research examines the effect of family policies on women’s employment outcomes in the United States, Germany, and Sweden. Ongoing projects include research on gendered labor markets, public policy, and female labor force participation; the diverse experiences of young adulthood; and understandings of racial and religious diversity in the United States. His work has been published in journals such as Social Problems and Research in Social Stratification and Mobility.

Jelle Visser is professor of sociology at the University of Amsterdam, where he directs the Amsterdam Institute of Advanced Labour Studies (AIAS). His main work is on labor relations, welfare states, social policies, employment, and trade unions. With Bernhard Ebbinghaus he edited the Trade Unions in the Societies of Europe series (published by Palgrave Macmillan) and with Anton Hemerijck he wrote “A Dutch Miracle” (1997).

Mara Yerkes is a post-doctoral research fellow in sociology at the Erasmus University, Rotterdam. She is the author of What Women Want: Individual Preferences, Heterogeneous Patterns? Her research interests include industrial relations, labor policy, work and care issues, and comparative welfare state research.
